**APhA's Delivering Medication Therapy Management Services** certificate training program (3rd Edition) presents a systematic approach for developing, implementing, delivering, and sustaining MTM services. It includes an overview of the marketplace for delivering MTM services, guidance for implementing MTM services in pharmacy practice, a review of the essential skills and knowledge needed for performing MTM successfully, and an organized process for identifying medication-related problems. The purpose of this certificate training program is to prepare pharmacists to improve medication use through the delivery of MTM services in a variety of practice settings.

**The goals of this program are to:**

- Advance public health and patient care through improved medication use
- Provide training to enhance pharmacists' ability to effectively provide MTM services
- Motivate increased numbers of pharmacists to establish MTM services
- Communicate benchmark practices for providing MTM services

**APhA's Delivering Medication Therapy Management Services** certificate training program has three components: online interactive self-study with assessment; the live seminar with online evaluation; and post-seminar case exercise. A Certificate of Achievement and continuing education credits will be awarded to participants who successfully complete all program components, including an evaluation.

More information on the program objectives and ACPE is available at:

<http://www.pharmacist.com/delivering-medication-therapy-management-services>

 The American Pharmacists Association is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education.
